Advantage Trailing Lines

Let the trend be your real friend

Description

Trend - the most important concept in trading. It can be found on every chart in every time frame. You can trade by following it or against it. In the short-term you use it to profit from the current position, and in mid- or long-term to properly filter and strengthen your entry signals. No matter what tools you use, sooner or later you have to define it. But do you exactly know when the trend begins, ends, or reverses? To achieve consistent profits, you need to know it as soon as possible and be on the right side of the trade as often as possible!

Advantage Trailing Lines were created to help you with this problem. We have tested, optimized, and re-optimized hundreds of parameters for thousands of stocks and futures to find statistically optimal settings. Now you can use Advantage Lines to identify the current trend, decide when to trade with it, and when to exit as it's reversing. It will help you to choose a stop loss level to limit the losses and to set a trailing stop, so your profits can grow until the very end of the trend. It is not a revolutionary tool, and you can find free versions on the Internet. But Advantage Lines has been precisely tuned with statistical research to help you find the edge for profitable trading.

Sample Trend Following Strategy

The RadarScreen Workspace provides sample trend following strategy. It is based on two Advantage Lines, the first of which (slower) is responsible for defining the trend, and the second one (faster) for generating signals in line with the direction of the trend.

Sample Rules:

1. Open Long - Buy signals (column Signals) only in uptrend (column Trend).
2. Open Short - Sell signals (column Signals) only in downtrend (column Trend).
3. Exit Long - Sell signals (column Signals) in uptrend or downtrend (column Trend).
4. Exit Short - Buy signals (column Signals) in downtrend or uptrend (column Trend).

The strategy is an example of how the Advantage Lines can be used. This is not an automated strategy and both the columns in Workspace for Signals and Trend and the lines in the charts are not linked together. Therefore, the Profit column only shows the profit for the signal indicator as the signals in the chart appear independently of the trend indicator. The strategy should only be considered as an aid to manual trading, not as an automated trading strategy.

ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK, AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. FOR EXAMPLE, THE ABILITY TO WITHSTAND LOSSES OR TO ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.
